

High privileged accesses recertification

PROCEDURE

Procedure Owner	Service Manager
Procedure Author	Service manager, Cybersecurity
Effective Date	April 2026
Applicable to	Louis Dreyfus Company Group ("LDC")

1. Introduction

THIS IS A TEST FOR DETECTION, NOT AN ACTUAL LDC DOCUMENT

2. People in charge

Here is a random list of names coming from a random LLM:

- 🔍 **Ana Rodríguez** (Spain) — ana.rodriguez@ldc.com
- 🔍 **Liam O'Connor** (Ireland) — liam.oconnor@ldc.com
- 🔍 **Aisha Al-Hassan** (Middle East) — aisha.alhassan@ldc.com
- 🔍 **Kenji Tanaka** (Japan) — kenji.tanaka@ldc.com
- 🔍 **Lucas Pereira** (Brazil) — lucas.pereira@ldc.com
- 🔍 **Naledi Mokoena** (South Africa) — naledi.mokoena@ldc.com
- 🔍 **Pierre Lefebvre** (France) — pierre.lefebvre@ldc.com
- 🔍 **Svetlana Ivanova** (Eastern Europe) — svetlana.ivanova@ldc.com
- 🔍 **Arjun Patel** (India) — arjun.patel@ldc.com
- 🔍 **Mei-Ling Chen** (China/Taiwan) — meiling.chen@ldc.com

3. Purpose

As stated in the Access Control domain policy (Access rights updates & review)

“Reviews of users’ access rights and use of accounts will be regularly performed. High privileged account rights and associated users or accounts will be reviewed on a more regular basis.”

This procedure defines what must be considered as *high privileged account rights* and provides guidelines to achieve this cybersecurity control.

The objective is to ensure the application of the least privilege principle.

4. Security principles

- Adding some more Louis Dreyfus and LDC keywords
- Blah blah
- Something
- Else

5. Definitions

5.1. High privileges accesses

Privileged accesses are accesses with a lot of privileges

High privileged accesses are privileges access that are high:

- Very sensitive

5.2. Access recertification

Access recertification is an IT control that involves Access recertification

A recertification campaign can be:

- Like this
- Not like this

6. Key elements

6.1. Key elements output by a random LLM

Here is a **clear, practical list of key elements involved in Account Recertification** (typically used in IAM / IGA programs):

7. 1. Identity & User Information

- User ID / Username
- Full name
- Employment type (employee, contractor, partner)
- Department / Business unit
- Job title / Role
- Manager / Approver
- Location (country, site)
- Joiner / mover / leaver status
- Employment start and end dates

8. 2. Account Details

- Account type (standard, privileged, service, shared)
 - System / Application name
 - Account status (active, disabled, locked)
 - Creation date
 - Last login date
 - Last password change
 - Account owner (for service/shared accounts)
-

9. 3. Access & Entitlements

- Roles assigned
 - Groups / memberships
 - Entitlements / permissions
 - Privileged access flags
 - Admin or elevated rights
 - Scope of access (read/write/admin)
-

10. 4. Business Justification

- Business purpose of the account
 - Justification for each role or entitlement
 - Alignment with current job function
 - Regulatory or compliance requirement (if applicable)
-

11. 5. Risk & Compliance Indicators

- Segregation of Duties (SoD) conflicts
 - High-risk or sensitive access
 - Privileged access usage
 - Critical system access
 - Orphaned or inactive accounts
 - Policy exceptions
-

12. 6. Certification Decision Inputs

- Certifier (manager, application owner, data owner)
- Review due date
- Recommended action (keep, modify, revoke)
- Supporting comments

- Evidence or logs (if required)
-

13. 7. Review Actions

- Approve access
 - Revoke access
 - Modify access
 - Escalate for further review
 - Delegate review (if allowed)
-

14. 8. Audit & Traceability

- Certification campaign name
 - Review timestamp
 - Decision history
 - Previous certification results
 - Reviewer comments
 - Audit trail / logs
-

15. 9. Technical & Operational Controls

- MFA requirement
 - Password policy compliance
 - Access expiration dates
 - Automated vs manual provisioning
 - Linked identities across systems
-

16. 10. Post-Certification Follow-Up

- Deprovisioning confirmation
 - Remediation tracking
 - Exception approval records
 - Certification closure status
-

If you want, I can:

- Tailor this list to **ISO 27001, SOX, GDPR, or NIST**
- Simplify it into a **manager-friendly checklist**
- Map it to **IGA tools (SailPoint, Entra ID, Saviynt, One Identity)**
